DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a method of providing enhanced media content, classified in class 725, subclass 135.
 - II. Claims 24-54, drawn to a storage medium and method of providing audiovisual data read from said storage medium, classified in class 386, subclass 46.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility it can be used to provide enhanced media content that does not include limitations claimed in invention II. However, Invention II is drawn to a storage medium and a method of providing enhanced content read from said storage medium. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2617

4. A telephone call was made to Martin Bader, Reg. Number 54,736 on June 29th 2005 to request an oral election regarding the before-mentioned restriction. However, Bader declined and requested a written office action.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
